Exceeding your expectations

ABOUT US

Rokk Industries Pty Ltd is an Australian owned and family run business based at Loganholme on Brisbane's south side. Our success is derived from our team of highly qualified and motivated personnel and their commitment to our motto "Exceeding your Expectations". With a focus on providing complete customer solutions within the water and wastewater industry you can always rely on Rokk Industries Pty Ltd to take care of your assets. We understand that the reliability of your equipment is paramount to the success of your organisation and therefore ultimately ours as well.

Rokk Industries provides mechanical and electrical services and sales for water and wastewater treatment and collection and we are the authorised service agent

for Wilo Australia. Established in 2012, the vast knowledge within our business, gained through many years of experience, ensures you receive only the best service, advice and reliability. Founded by Kirk Kotynski, a 17 year veteran in the pump industry and previous national service manager at one of the leading pump manufacturing companies, our organisation knows and understands the pump industry like no other.

Whether it's installation, service, repairs or sales, Rokk Industries are your mechanical equipment specialists. From municipal plant, both local and regional, to a diverse range of general industry, we can provide you with the solutions you're looking for with the peace of mind knowing that our quality of work and

attention to safety sets the benchmark for all others to aspire to.

SERVICE AND REPAIR

Reliability is paramount to the success of every industry and understanding how to maintain reliability is a fundamental characteristic for which Rokk Industries is renowned for.

Our dedicated, highly skilled and qualified technicians work closely with you to achieve the best possible outcome to meet your budgetary requirements. We recognise the need in the service repair industry for an independent supplier, who rather than only offering a bias recommendation of a particular manufacture will source the superior solution.

Our service capabilities at Rokk Industry Pty Ltd include:

- In house repairs to all makes and models of pumps and auxiliary equipment at our fully catered workshop facility.

- Preventative maintenance and condition monitoring utilising state of the art crest factor condition monitoring.
- On site corrective maintenance, repairs and fault finding applying our technical expertise to diagnose and systematically repair all of your industry concerns.
- Precision machining of new parts and reclamation works of existing repairable components.

INSTALLATION

If it's a trouble free service provider that you're after regarding onsite installation work than look no further. Rokk Industries will allow you the peace of mind knowing that the job shall be done right, first time and with safety at the forefront of our every move. Our team is fully catered with the latest and best equipment including state of the art confined space gear, 5T service truck c/w remotely operated Palfinger crane and fully kitted service vehicles. So whether it's a pump station upgrade, treatment plant refurbishment, general transfer pumps, bore pumps, vacuum systems, dosing plant or pipe and valve works, we can deliver including turnkey packages.

Some examples are the two 110kw Moura Backwash Pump set installations for Banana Shire Council. This

involved the supply of new pumps to suit the existing motors, fabrication of the pump bases, removal of the old pumpsets and installation c/w pipework modifications and wafer NRV's.

We have also supplied and installed six new surface aerator drives at Elanora STP for GCCC which involved fabricating the bases at our workshop facility.

We have supplied and installed two new 80kw Wilo pumps at PS67 for Redland City Council. Works included the fabrication of new pump bases, new sluice and NRV's, pipework modifications to suit the new pumps as well as a complete new riser in the dry well to mirror that of the existing c/w DN300 ABB flow meter.
